

# What's up May!

## Temps de flors 2021

With spring came 'Girona Temps de Flors' and with it a new challenge for primary school students.

We were very excited to take part in this beautiful project. "Houses of the world" was the theme from which we had to start and then let our imagination and creativity fly. We designed a house that reflected the effort, dedication, cooperation, organisation, teamwork, in short, what characterises us and our way of doing things. Given the weight of emotional work in school, we could not miss the values that we instill in our students every day.

## Temps de flors 2021

Each of the elements that were part of the house had a meaning and we would like to share it with you. The lily was the flower we chose as it is representative of purity, innocence and beauty as well as children. The olive tree, an emblematic symbol of our school, refers to lifelong learning. The flags and words painted on the stones wanted to convey the interculturality present in the school and the values we want to convey to the students. The tricycle was chosen and made because the three wheels symbolise the fundamental pillars for educational success: students, families and the educational community. The "lawn boy" and natural plants represented the care of the environment and the planet. The set of these elements led us to the reflection that: "Values are the roots of a house", a message we could find on the wooden poster.

This project would not have been possible without the involvement and collaboration of families, students and teachers.

The result was very rewarding.
